EXPERIENCE

Software Quality Assurance Trainee

Sirius Dream (Pty) Ltd | Aug 2026 – Present

- Executed structured manual software testing procedures to validate application functionality and performance against design specifications.
- Authored and maintained test cases covering functional requirements, regression edge cases, and user workflows.
- Logged and documented software defects using industry-standard QA practices and ticketing workflows.

Intern Team Lead & Software Developer

Life Choices Academy | Sep 2025 – Present

- Led a team of intern developers through daily stand-ups, sprint planning, and backlog grooming in Scrum workflows.
- Developed full-stack web applications using JavaScript, Vue.js, Node.js, Express, and PostgreSQL.
- Built responsive user interfaces and managed collaborative codebases via Git/GitHub.

PROJECTS

LC Studio — PHP, SQL, Authentication, CMS

Built the PHP and SQL backend for the admin side, including secure admin authentication and a CMS-style system for adding new admin accounts without editing code.

Lumina — Manual QA, Test Cases, Regression Testing

Performed manual QA testing on the admin application, created test cases for user workflows and regression scenarios, and logged defects using standard ticketing practice

Go Card (Prototype) — Flutter, NFC, Mobile, Transit

Developed a prototype mobile NFC application enabling Golden Arrow commuters to load transit trips onto GA clip cards directly via smartphone,
